

Unit One Review

Definitions to Know:

- qualitative
- quantitative
- parallax
- meniscus
- mass/weight
- volume

Concepts to Know:

- significant digits
- percent error
- density
- fundamentals of lab safety covered in class

Be able to do:

- make appropriate measurements using digital and non-digital measuring devices
- significant digits
- representing mass by difference calculations
- density calculations
- percent error calculations
- density lab procedures and calculations
